capsule collections

neorigore exhibition

essentiality that inspires concepts: geometric rigor, culture of architecture, reinterpretation of the art of decoration, a look at a past made up of precious traditions that are deconstructed, stripped of the superfluous and updated thanks to skilled craftsmanship.

essenzialità che porta con sé la potenza dei concetti ispiratori: rigore geometrico, cultura delle architetture, reinterpretazione dell'arte della decorazione, sguardo ad un passato fatto di tradizioni preziose che vengono decostruite, sfrondate del superfluo e attualizzate grazie a esecuzioni artigianali di grande maestria.

giacobazzi presents the new projects in collaboration with atelier nuanda, founded in 2021 by cecilia rinaldi and marco martelli, both with long experience in the design world, and with federico peri, one of the most promising talents in Italian design.

giacobazzi presenta i nuovi progetti frutto della collaborazione con atelier nuanda, nato nel 2021 per volontà di cecilia rinaldi e marco martelli entrambi con una lunga esperienza nel mondo del design, e con federico peri uno dei talenti più promettenti del design italiano.

the new capsule collection wooden tile breaks the mould of coffered floors using eclecticism, innovative finishing, the redefinition of interior architectural spaces thanks to a bold interplay of simple geometric shapes and contrasting colors.

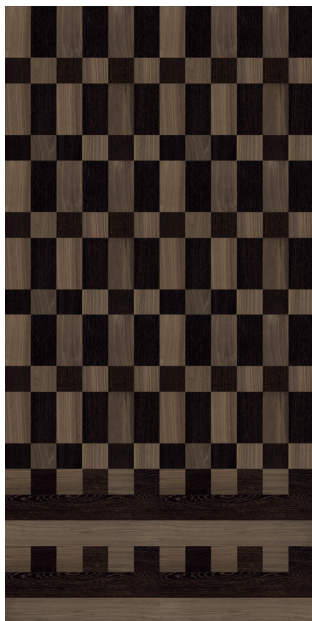

la nuova capsule collection di mattonelle in legno, rompe gli schemi dei pavimenti a cassettoni e adotta un linguaggio fatto di eclettismi, di finiture materiche innovative, di ridefinizione degli spazi architettonici interni grazie a un ardito avvicinarsi di forme geometriche semplici e di cromatismi a contrasto.

the arrocco project by atelier nuanda is inspired by the neo-moorish style and plays with the pure shapes of geometry. federico peri's projects follow different suggestions. tessuti re-elaborates textile patterns on wooden surfaces, segmenti tries its hand at infinite combinations alternating horizontal and vertical segments, blasone reinterprets the theme of the lozenge as ultimate inspiration of ancient dwellings.

il progetto arrocco di atelier nuanda trae ispirazione dallo stile neomoresco e gioca con le forme pure della geometria. i progetti di federico peri seguono suggestioni differenti. tessuti rielabora trame tessili su superfici lignee, segmenti crea infinite combinazioni alternando segmenti orizzontali e verticali, blasone reinterpreta il tema della losanga come massima ispirazione delle antiche dimore.

design by atelier nuanda

the geometric language used defines a new spatiality of the environments through the combination of precious materials such as american walnut and wenge that create interesting chromatic games and infinite combinations.

il linguaggio geometrico utilizzato definisce una nuova spazialità degli ambienti tramite l'accostamento di materiali pregiati quali il noce americano e il wengé che creano interessanti giochi cromatici e infinite combinazioni.

The image shows a bright interior space with a large window. The window has a blue frame and a thick blue horizontal bar above it. Below the window is a blue radiator. The floor is covered in a patterned carpet with dark brown and light tan squares. To the right, there is a red wall and a glass door. The text 'blasone capsule collection' is overlaid on the right side of the image, with 'design by federico peri' below it.

like reminiscences of historical residences rather than contemporary homes that convey authenticity. the essences used for these products are oak and wengè. the tile measures 58 x 35 cm.

come reminiscenze di storiche dimore piuttosto che contemporanee abitazioni che trasmettono autenticità. le essenze che compongono il prodotto sono rovere e wengé. le mattonelle misurano 58 x 35 cm.

blasone capsule collection

design by federico peri

blasone draws its roots from tradition. the lozenge shape is the main feature that jumps to the eye and that - thanks to different possibilities of combination - allows the product to take on different interpretations.

blasone attinge le proprie radici nella tradizione. la sagoma a losanga è la sua principale caratteristica insieme alle possibilità di accostamento che permette differenti composizioni.

■ wengè
■ oak

A minimalist interior space featuring a black door set in a white wall. The floor is covered in a black and light-colored wood-grain checkered tile pattern. To the left of the door, a large, vertical, grey, segmented pipe stands prominently. On the far left wall, there are two electrical control panels with red buttons. The overall aesthetic is clean and modern.

segmenti
capsule collection
design by federico peri

segmenti a/b components

segmenti a **segmenti b**

thanks to the various sequences of the two models it is possible to obtain numerous effects, each one completely different from the other. in this case is used wengè and oak. the tile measures 60 x 60 cm.

segmenti orizzontali, verticali, che una volta uniti diventano un tutt'uno rendendo difficile l'individuazione del singolo modulo. le essenze utilizzate sono il rovere ed il wengè. le mattonelle misurano 60 x 60 cm.

segmenti capsule collection

design by federico peri

segmenti is an essential geometric project. its main characteristic is the combination of the two versions of the "tile", one slightly different from the other.

segmenti è un progetto geometrico essenziale. definisce la sua caratteristica principale nell'accostamento delle due versioni di "mattonella" differenti tra loro. grazie all'unione dei due modelli si possono generare svariati risultati.

tratteggio/continuo components

tratteggio **continuo**

materiality of great impact is achieved through the alternation between polished portions and sandblasted portions, where the grains emerge as in a bas-relief of each tile. in this case is used, oak, but the perception of it varies depending on the angle at which it is observed. the tile measures 58 x 58 cm.

a conferire una matericità di grande impatto è l'alternanza tra porzioni sabbiate dove le venature emergono come in un bassorilievo e porzioni levigate di ciascuna mattonella. L'essenza è il rovere ma la percezione di essa varia a seconda dell'orientamento con la quale la si osserva. le mattonelle misurano 58 x 58 cm.

tessuti capsule collection

design by federico peri

the project re-elaborates textile on wooden surfaces. two variants are available depending on the arrangement of the basic module: tratteggio composed of alternating lines which produces a sort of hatching, continuo formed by parallel lines of different widths.

il progetto rielabora trame tessili su superfici lignee. due le varianti disponibili a seconda della disposizione del modulo base: tratteggio composto da un'alternanza di linee orizzontali e verticali che formano una sorta di tratteggio, continuo formato da linee parallele di diversa larghezza.
