■ THE KARIM FOR ALLOY COLLECTION

Designed by Karim Rashid exclusively for ALLOY, this innovative collection of metal tiles delivers a highly contemporary look with an unsurpassed finish that pushes the boundaries of traditional tile design.

Drawing on his fascination with patterns, Karim plays with the idea of pattern, grid and repetition to give richness and depth to the Cartesian landscape. The undulating, curvilinear, reflective metal forms give the 2-dimensional surface a sense of 3-dimensions, to striking effect.

The 8 unique Karim for ALLOY designs are available in an array of high quality metals and finishes including: Copper; Stainless Steel (brushed finish, mirror finish, matte finish); Raw Steel; Brass and Titanium, and work equally well across interior, exterior or landscape design applications.

Each tile has been carefully developed, tested and manufactured in ALLOY's Australian factory and punched from an individual sheet of solid, 1.6mm high quality metal to deliver a seamless, hardwearing finish designed to last a lifetime. www.alloydesign.com.au
