PRESENTS

Giacobazzi

An **history** that starts in **Italy** in the
60s with the **Giacobazzi family**.

Four generations have mastered the art
of **wood surfaces**.

A close-up photograph of a wooden workbench with several light-colored wood shavings scattered across its dark, textured surface. The shavings are curled and thin, suggesting they were recently shaved from a piece of wood. The background is blurred, showing more wood shavings and the edge of the workbench.

With a **great knowledge**
of **wood processing** and
of its **changable**
natural characteristics

What drives the
brand is the **love**
for wood and
innovation,
expressed through a
constant research
of **new shapes,**
shades and
textures.

– *FORME* –

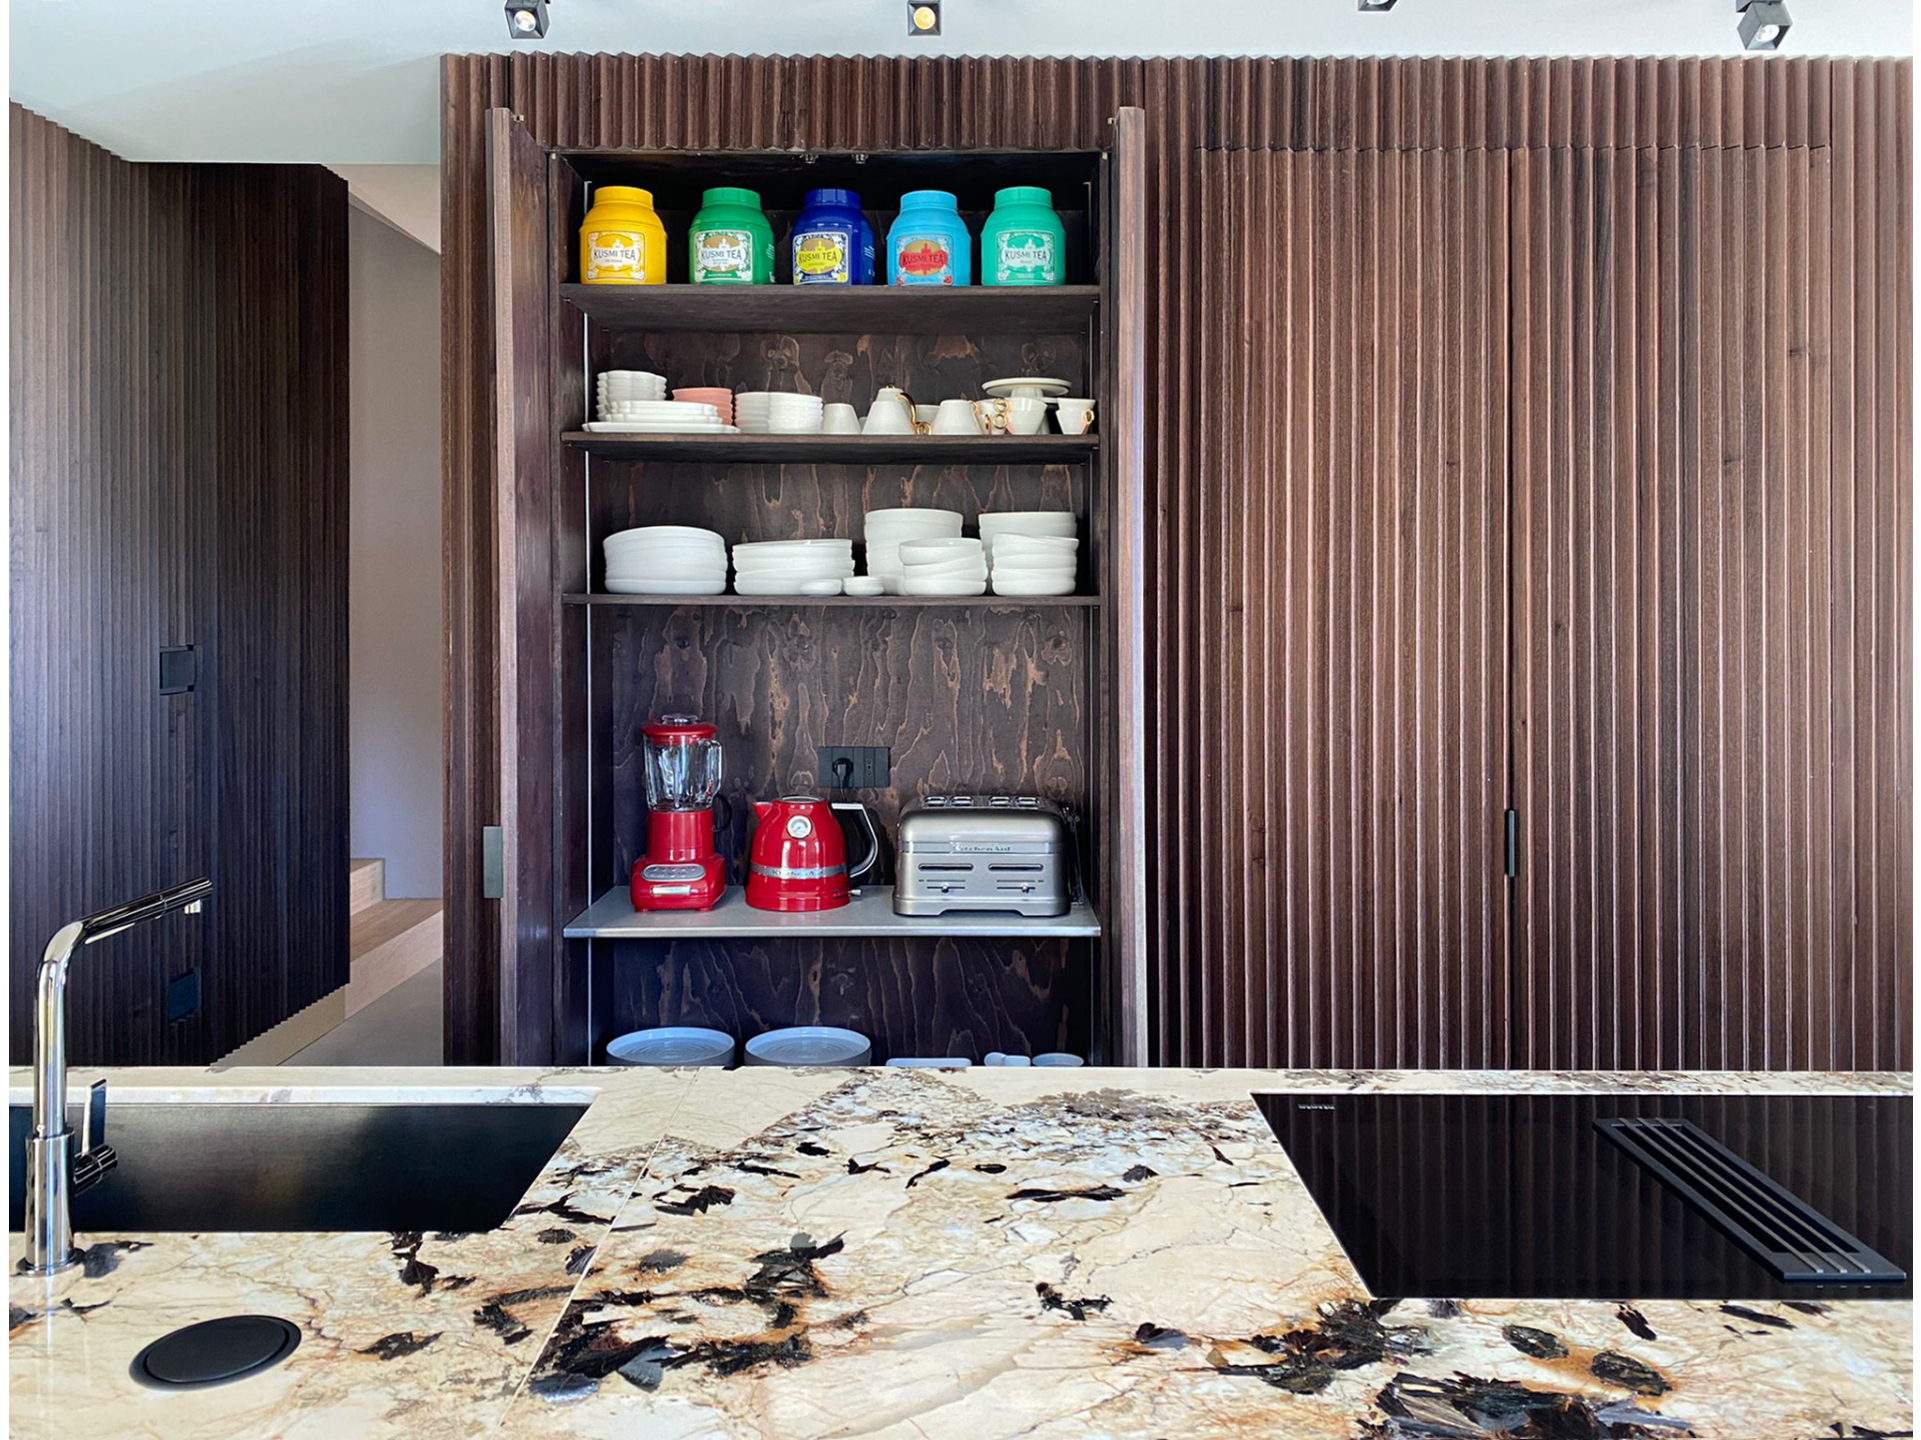

«*Forme*» is the **new**
frontiere of boiserie...

... where **volume** becomes a
form of **decoration**
applied to wood

A play of joints,
grooves, clashes
between full and
empty

An
**innovative
composition**
that will
give a
**never-
fading
charme** to
any room
