Installation Information

We recommend using a tile leveling system to install this product.

Before installing the tile you should:

- Ensure the perfect planarity (flatness) of underlying floor base.
- Always double-check the quality of the tiles.
- When setting, tile should be only slightly staggered so that the ends of the tiles are within 8" or less from the ends of the corresponding staggered tile. (See figures 1 & 2)
- Staggered spacing does not need to be uniform, but should not exceed 8" recommendation.
- It is preferable to use a grouting material that matches the color of the tiles.
